1 Introduction and explanation of symbols

Changes are sorted by "type" and then chronologically with the most recent at the top. These symbols denote the various action types: =add, =fix, =update

2 Version 0.1 (unreleased)

2.1 Changes to Project Administration

- Initial plugin code extracted from the old views plugin. Committed by TS.

2.2 Changes to the Code Base

- Enabled the output html serializer to be configurable to either xhtml or html. See docs: [Configure output serializer](#). Committed by DC. See Issue [FOR-1156](#).
- More i18n work by Sjur on Dispatcher. This patch correctly localizes menus & tabs. Committed by TS. Thanks to Sjur Moshagen. See Issue [FOR-937](#).
- Add ability to get a list of contracts provided by a plugin. For this to work the plugin name must have "plugin" within it, e.g. "org.apache.forrest.plugin.input.doap". Requesting `ls.contracts.org.apache.forrest.plugin.input.doap.source.xml` will return a source listing of plugins provided by the named plugin. Requesting `ls.contracts.org.apache.forrest.plugin.input.doap`. [FORMAT] will return a formatted output document listing all templates supplied by the identified plugin. Committed by RDG.
- Extending the dispatcher with an internal format. This internal format is our xdoc or xhtml2. The internal format will then be contacted by e.g. html contracts. Committed by TS.
- Added first implementation of the dispatcher. Including contract bean implementation and interface; dispatcher exception and dispatcher transformers. Committed by TS.
- Adding the dispatcher concept documentation from the site-author. Committed by TS.
- Activated multiple output formats to be configured via a View. Committed by TS.
- Added contracts and nuggets to the "view" plugins. Committed by TS.
- FOR-975 Renaming tiles to panel. Committed by TS. See Issue [FOR-975](#).
- Rename to ContractsMessages_en.xml, part of i18n changes by Sjur. Committed by DC. Thanks to Sjur Moshagen. See Issue [FOR-939](#).
- Cleaning up usage of structurer using the new chunks of FOR-1059. Reducing code duplications. Committed by TS.

- Cleaning up locationmap from the former xdocs location. See [news #cleanup.15.06.07](#) how to update. Committed by TS.
- i18n: Add LocaleAction action wrapper, and use the locale provided by it. Was taking the locale directly from the request instead of using the standard method in Forrest: LocaleAction. Committed by DC. Thanks to Sjur Moshagen. See Issue [FOR-935](#).

2.3 Changes to Documentation

- Added an examples tab and section to show working examples of how to add independant and plugin dependent contracts. A first example showing the POD plugin & contract has been started. Committed by GM.
- Adding the "how tos" from the site-author to this plugin. Committed by TS.
- Added a dispatcher glossary. Thanks to Thorsten for moving to the plugin. Committed by GM.
- Added infos of the pattern the plugin is using. Committed by TS.
- Updated the "how it works" section and moved it to its own site. Committed by TS.
- Added section "linking to external css files" to howto-structurer-dsl doc. Committed by TS. Thanks to Paul Bolger. See Issue [FOR-768](#).

2.4 Contributors to this release

We thank the following people for their contributions to this release.

This is a list of all people who participated as committers:

David Crossley (DC), Gavin McDonald (GM), Ross Gardler (RDG), Thorsten Scherler (TS).

This is a list of other contributors:

Paul Bolger, Sjur Moshagen.

3 All Committers

This is a list of all people who have ever participated as committers on this project.

- David Crossley (DC)
- Ross Gardler (RDG)
- Thorsten Scherler (TS)
- Gavin McDonald (GM)
- Volunteer needed (open)
