The Apache Forrest project gives thanks ...

1 General thanks

<u>The Apache Software Foundation (ASF)</u> provides an excellent home for our community. See also the <u>ASF thanks page</u> and the <u>ASF sponsors page</u>. Without *your* support The Apache Software Foundation would not be here for us all.

The individual developers who participate via the dev mailing list.

Our committees and Project Management Committee.

Our <u>users</u>. See some of their <u>example sites</u>.

2 Packaged software attribution

Various products are packaged with the Apache Forrest distribution. These products use a license that is compatible with the Apache License. Most products do not require specific attribution, but some do request that. See the NOTICE.txt and LICENSE.txt files in the distribution.

3 Supporting software attribution

Developers use various tools to assist with their work, such as <u>xml editors</u> and IDEs such as <u>IntelliJ IDEA</u> or <u>Eclipse</u>. Most tools do not require attribution, but some do (<u>YourKit Java Profiler</u>).
